

"Enable smarter printing in your modern workplace"

Solution Overview

Printing is a fundamental task in just about every office and small business environment. Alliance Business Technologies' Cloud Print Management Solution makes it possible for customers to install, use and maintain a cloud-managed printing environment quickly, efficiently, and, perhaps most importantly without owning a print server.

This cloud printing solution drastically simplifies the provisioning, management and control of printers and drivers from a cloud-based portal, to all cloud, serverless or server infrastructure with distributed offices or users.

Apart from minimizing the on-premise IT infrastructure to support printing, this solution helps IT managers avoid the hassle and minimize costs typically associated with printing and maintaining a print environment.

Modern Printing - Print anytime, anywhere, from any device or printer

Print-Ready Convenience

Easily onboard new employees and support roaming users with print-ready universal configurations.

Global Secure Print

Release print jobs using browser, smartphone or tablet on any printer any model.

Direct & Mobile Print

Windows, Mac, Chromebook, iOS & Android.

Card-based Secure Print

Release print jobs using card or ID code.

Key Focus Areas

Serverless Architecture

Eliminate print servers and create a secure, cloud managed print infrastructure

Simplify Print Management

Simple to manage and easy to deploy. Automatic updates and self-service provisioning.

Improve Productivity

Intelligent print driver selection and print queue installation by location, group or self-service.

Reduce Costs by 50% or more

Significantly reduce on-premise infrastructure costs, services, support and maintenance fees.

Single Sign-On Secure Access

Single Sign-On and secure access to Printix using Microsoft Azure AD or Google Workspace.

Central Management Console

Centrally manage printers and users. Visual analytics to help transform data into insight.

Supports all Network Printers

Independent and multi-vendor support. Print to any printer from any BYOD device, reliably and securely.
